

Nighttime vs Daytime LST: SHAP Dependence Profiles

Nighttime cooling threshold at $\approx 7\text{--}8^\circ\text{C}$; daytime effect weaker and delayed

Nighttime: strong protective effect below $\approx 7\text{--}8^\circ\text{C}$

(A4) 10th %ile Nighttime LST

Daytime: weaker, shifted threshold at $\approx 15^\circ\text{C}$

(A5) 10th %ile Daytime LST
